

## About the Show

*The Book* transports Joe, Sam and Fred back to ancient Rome 120 C.E.—and face-to-face with one big ol’ gladiator. They’ve seen plenty of professional wrestling on TV—but will the smackdown body slam be enough to save them at the Coliseum?

## Introduction

Studying gladiators in ancient Rome—a perennial favorite topic for students—can lead to discussions about stereotypes and myths. In exploring the images of gladiators in popular culture versus historical reality, students can explore the research process as well as the complexities involved in discerning fact from fiction.

## Historical Background

Roman gladiators were trained in mortal combat, a form of public entertainment in ancient Rome. The word *gladiator* comes from the Latin word *gladius* (sword). Wealthy or important Romans often asked for funeral games to be held in their honor. In 264 B.C.E six men were hired to fight at a funeral—probably the first gladiators. The popularity of the games grew and spread throughout the Roman empire. Eventually gladiatorial games became lavish public entertainments, especially after the Coliseum in Rome opened in 80 C.E.

Roman gladiators were usually convicted criminals, slaves, or prisoners of war. Many gladiators came from the lands Rome had conquered. Although there were a few women gladiators, in 200 C.E. women were banned from fighting.

# See You Later, Gladiator!

## Historical Background *continued*

Some gladiators who managed to survive the fierce fighting became famous or even wealthy. Men of the very lowest social rank sometimes bound themselves to the owner of a gladiator troupe, enduring branding, chains, flogging, and brutality at the hands of their masters to become gladiators. Gladiators went through intense training and were taught complex moves so they could better entertain the audience.

Gladiators were supposed to fight to the death, but if they fought extremely well the crowd could decide to spare both fighters. The crowd voted by showing thumbs up or thumbs down—although whether or not thumbs up meant “life” has not been verified. Sometimes gladiators won prize money.

At a large event there could be hundreds of gladiators. In the Coliseum, the audience could be as large as 50,000 people. After other entertainments in the morning, such as hunting wild animals and the execution of criminals, gladiators would enter the arena. They would approach the emperor and proclaim, *Ave, Imperator, morituri te salutamus* (Hail, Emperor, we who are about to die, salute you).

As Christianity spread and the power of the Roman Empire declined, the appeal of the games diminished. In 326 C.E. Constantine began the process of abolishing gladiator games. In 400 C.E. Emperor Honorius banned gladiators forever.

# Activity 1

## Let The Games Begin!

Students compare what they think they know about gladiators with facts they learn through research. They then use the information to act as reporters and write an article about a gladiatorial game.

### Instructions

1. Both the book and the show *See You Later, Gladiator* portray Horridus as a laughable figure, but being a gladiator was not so funny. Ask students to volunteer what they already know about gladiators. Create a two-column chart entitled Gladiators. Label one column “Fact” and the other column “Fiction.”
2. Divide the class into small groups. Explain that students will be researching gladiators, the conditions under which they lived and fought, and how they have been portrayed in books, movies, and legends.
3. After students share what they have learned, revisit the chart. Which items are facts? Fiction? Add new information to the chart and discuss the differences between the fictional portrayals and real gladiators.
4. Ask students to act as reporters and write an article describing a gladiatorial game they have just seen. Encourage students to include as many details as possible about the crowd, the events of the day, the emperor, the outcome of the games, what the gladiators wore, what nationality they were, etc.
5. You may want to offer students the option of being sportscasters. Working in pairs, students can interview a gladiator after a game. They will need to convey the information they have learned as they ask and answer questions. (Students may want to write a script of the interview beforehand.)

### Take It Further

Have the students work together to create a mural of an ancient Roman town with a stadium on game day.

### Objectives

- to expand students' knowledge of ancient Rome and gladiators.
- to practice research skills

### Materials

- art and writing supplies
- chart paper and easel

### Curriculum Standards

- **NCSS**  
*Individuals, Groups, and Institutions:* Students demonstrate an understanding of concepts such as role, status, and social class in describing the interactions of individuals and social groups.
- **NCTE/IRA**  
Students use spoken, written, and visual language to accomplish their own purposes (e.g., for learning, enjoyment, persuasion, and the exchange of information.)

# Activity 2

## Gladiator “Step” Book

This activity helps students use similes in their writing and then present their knowledge about gladiators in the form of a “step” book.

### Instructions

1. Ask students to use their imagination to visualize how a gladiator looks, sounds, smells, etc.
2. Ask the students the following questions. Encourage a wide variety of answers. Record their responses on the board.
  - What do gladiators look like?
  - What do gladiators sound like?
  - How do gladiators smell?
  - How do gladiators eat?
  - What might a gladiator feel like?
3. Distribute three sheets of paper to each student. Show students how to arrange the paper so they have a one-inch overlap on each page. Each flap is a “step.” Demonstrate how to fold the paper into a six-page “Step” Book

### Objectives

- to improve students' understanding and use of language
- to create similes
- to expand students' knowledge of ancient Rome

### Materials

- art and writing supplies
- 3 sheets of white 8 1/2" x 11" paper per student

### Curriculum Standards

- NCSS  
*Individual Development and Identity:* Students relate such factors as physical endowment and capabilities, learning, motivation, personality, perception and behavior to individual development.
- NCTE/IRA  
Students apply knowledge of language structure, language conventions, (e.g., spelling and punctuation, media techniques, figurative language, and genre) to create, critique, and discuss print and non-print texts.

## Activity 2

4. Have students write the title of their “Step” Book on the first page. Have students label each “step” with one of the following sentences.
  - Gladiators look like \_\_\_\_\_
  - Gladiators sound like \_\_\_\_\_
  - Gladiators feel like \_\_\_\_\_
  - Gladiators smell like \_\_\_\_\_
  - Gladiators eat like \_\_\_\_\_
5. Ask students to complete each sentence and then draw a picture to go with it. You can also give examples, such as:
  - Gladiators look like mice caught in a giant cage.
  - Gladiators sound like monster trucks at an indoor rally.
  - Gladiators feel like gristle on a bone.
  - Gladiators smell like three-day-old meat.
  - Gladiators eat like hungry bears at the end of their hibernation.
6. Explain to students that they have been writing **similes**—a figure of speech that makes a comparison using either *like* or *as*. Writers use similes to make their descriptions richer.
7. Have students read each other’s “Step” Books.
8. Ask students to notice similes in the books they read. For example, on page 83 of *See You Later, Gladiator* Jon Scieszka writes, “The green time mist slipped away like air leaking out of a tire.” Challenge your students to find other similes as they read this or other books.
